

Just In Mac Lite NDI 2025

Streamlined NDI® Capture for macOS

Just In Mac Lite NDI is a standalone multichannel capture application for your essential broadcast recording needs.

Record NDI format sources using Crash or Schedule recording modes.

**Single App, 8 Channels License**

Just In Mac Lite NDI lets you record up to 8 channels of HD or UHD video on an Apple silicon Mac, with growing file support, in one flexible and budget-friendly standalone application.

**NDI Format Support**

Full discovery and recording support for NDI High Bandwidth and NDI HX3 sources.

The NDI High Bandwidth recording performance depends on the Apple silicon hardware and the network infrastructure used as well as the available hard disk space. Please consult the NDI related information available on the official ndi.video website.

**Easy Setup and Wide Codec Support**

Just In Mac Lite NDI offers a guided streamlined setup for effortless configuration. Designed specifically for NDI® input formats, it provides full support for production codecs including Apple ProRes, H.264, H.265 (HEVC), and XDCAM HD 422 MXF — all ready to use out of the box.

**Extended Growing File support for MOV**

Growing file support for the MOV container with Apple ProRes when used with Adobe® Premiere® Pro (Classic QuickTime) or DaVinci Resolve (Harmonized QuickTime) presets.

**Apple Hardware Encoding Support**

Just In Mac Lite features the unique option to choose either CPU or hardware-accelerated encoding when using the Apple silicon chipset, to overcome possible encoding limitations.

**Extensive Timecode Input Support**

Just In Mac Lite NDI supports various timecode sources to accommodate your needs. Choose between Computer Time or LTC over Audio modes.

**Closed Caption Recording Support**

Extended support for CEA-608 (SD) and CEA-708 (HD) captions. The Closed Captioning Data is written into the closed captioning track of either the QuickTime or MXF OP1a container.

**REST API Support**

By using REST API calls you can seamlessly integrate Just In Mac Lite NDI into your tailored workflow and initiate recordings remotely, directly from external systems.

**New Licencing Process**

The licensing process has been redesigned and customers can now seamlessly activate, deactivate, and transfer their licences between different machines, making the experience smoother than ever before.

**QuickTime**
